FOR IMMEDIATE RELEASE
September 2, 2008

Senator Ken Salazar to Headline IPAMS 2008 Rocky Mountain Energy Technology Conference

(DENVER) – Opinion polls show that Americans want more domestic oil and gas drilling on federal lands, but they also expect industry to use the best technology and practices to develop it. Is industry ready to meet the challenge?

The Independent Petroleum Association of Mountain States (IPAMS) is sponsoring the 2008 IPAMS Rocky Mountain Energy Technology Conference to be held September 4-5, 2008 at the Sheraton Hotel (1550 Court Place) in downtown Denver.

"Industry has invested billions of dollars in new technology to produce in areas that were thought were impossible just a few years ago. Countless technologies are now available to improve efficiency, reduce costs and help our industry meet growing environmental expectations," said Marc Smith, IPAMS Executive Director.

Speakers at the conference include many nationally recognized thought leaders on the nexus between technology and meeting America's energy challenge, including: **Senator Ken Salazar, Mike Smith of the Interstate Oil & Gas Compact Commission, Mike Ming with Research Partnership to Secure Energy for America, Jerome Blackman with the United States Environmental Protection Agency, Roy Long with the Department of Energy, Don Peay with Sportsmen for Fish and Wildlife, and Dag Nummedal with the Colorado School of Mines.**

This conference is co-hosted by **Colorado School of Mines, University of Wyoming, University of Utah, RPSEA, and NETL;** institutions committed to the research and development of new technologies that improve efficiency, reduce costs, and help industry meet growing environmental expectations
For a full agenda and to register visit ipams.org

Who: Thought leaders from energy companies, academic institutions, research consortia, government, and NGOs who are interested in new technologies and practices to reduce the environmental impact of energy development.

What: 2008 IPAMS Rocky Mountain Technology Conference will focus on the technologies and practices that are shaping the future of oil and natural gas in the Intermountain West.

When: Thursday, September 4, 2008 and Friday, September 5, 2008

Where: Sheraton Hotel
1550 Court Place
Denver, CO
